Universal Cockpit Procedures Trainer

Universal Cockpit Procedures Trainer

Our most cost effective airline pilot training solution, suitable for training rooms with limited space or a need to be able to quickly swap between different aircraft or simulator types or to have the option of transporting to another location easily.

Includes the essential components of the cockpit which include the main Instrument panel, Glareshield, Overhead panel and centre control stand.

Graphics are printed at 100% full scale on a polypropylene media covered in a hard wearing scratch and UV protective laminate and mounted on rigid foam core signage grade board with plastic safety edging.

Base stand constructed of simple yet sturdy Black Powder Coated Aluminium Square Hollow Section (SHS) secured by stainless steel bolts requiring only a hex key tool for fast and easy assembly and disassembly for relocation or storage.

Pricing From:

\$2400.00AUD
